Undergraduate Research
Technologies: Python, Django, HTML, CSS, MySQL, Postgres
- 11/2021 - Current: Brazilian Space Agency
Assistant
Technologies: Plone, HTML, CSS, Javascript

PERSONAL PROJECTS

- **wanna be Wordle**
A browser game with similar logic to the popular game "Wordle", by The New York Times.
Developed with the intention of putting into practice knowledge in Angular, Typescript, HTML and CSS.
Live app: <https://angular-wordle-maybe.web.app/>

- **Portfolio/Personal page**
A web page to host my projects and some personal and contact information. Developed with React, Typescript, Ionic, HTML and CSS.
Live app: <https://aeciofgm.vercel.app/>

- **Portuguese proficiency test quiz**
A questionnaire developed for foreigners to test their knowledge of the Portuguese language.

The idea is to automatically store the name, email and score of each user in a Google Sheets spreadsheet, and return to the user, on the page itself, their level of proficiency.
Developed with: ReactJS, Next.js, HTML and CSS.
